

DOUBLE JERSEY RIB INTERLOCK CIRCULAR KNITTING MACHINE

● Machine Description

Double Jersey Rib Interlock Circular Knitting Machine install with two tracks CAMs on the dial plate and four tracks CAMs in the cylinder, through adjusting the position of CAMs, machine can knit various fabrics such as twill, interling fabric, air layer fabrics, little jacquard interlayer gasket, bubble-bubble, crape, knitting cloth, pique fabric etc.. If the double jersey machine install lycra feeders and attachments, it can also knit stretch double jersey fabric. All types of fabrics produced by the machine are widely used in producing underwear, coat fabrics, varied sportswear and fashion fabrics.

● Machine Features

1. Double jersey interlock machine cylinder is stainless steel imported from Japan, which make sure the cylinder have high quality and good performance.
2. We use steel ball runway structure with oil immersion to make the bed plate of double jersey interlock knitting machine, which make sure the machine running stable and smoothly, low noise and high abrasion resistant.
3. Components for drive system of interlock knitting machine is made by superior material through high efficient heat treatment. Gear and other main components are made in Taiwan and bearing are imported from Japan. All of these make the machine with high precision drive system, low running noise and stable operation.

● Machine description

| Model | Cylinder Diameter | Machine Gauges | No. of Feeders | Speed |
|-------|-------------------|----------------|----------------|-----------|
| HFDI | 30"-44" | 16-40G | 72F-108F | 23-28 RPM |
